USB is a widely accepted user interface standard. Our industrial devices are stylish enough for the desktop and rugged enough for industry with functionality and performance for even the most demanding applications. Our software has been proven in a wide range of industrial applications and has passed where competitors failed.

Being hot swappable these plug & play devices makes USB a very attractive way to add serial connectivity to your PC and ideal for notebooks and laptops that only have USB connectivity options. Instantly adding extra serial ports when required!

Ethernet to Serial device servers provides connectivity to serial devices via the network. Allowing control and monitoring of connected devices remotely and over the web.

Boost.Lan drivers for Windows users creating local COM ports, Web configuration and RFC2217 compliant interface for non-Windows users.

Brainboxes Class 2 RS232 Bluetooth converters are simple and easy to use and can be up and running within minutes. With 3-wire operation, integral antenna, and the option to configure as a pair for true cable replacement, these devices are an engineers dream.

Range Features

- Includes 1m USB cable
- High retention USB connector for secure connections
- Max baud rate: 921,600
- Plug & Play
- Fit any USB port
- Fantastic, proven, robust Boost software for excellent application compatibility
- Rugged metal enclosure
- Accessories available

Range Features

- Includes 0.25m USB cable (Type A plug to Type A Recepticle)
- Max Baud rate: 921,600
- Plug & Play
- Powered by USB port - no external power supply required
- Fantastic, proven, robust Boost software for excellent application compatibility
- Fit any USB port
- Best in class form factor & software

Range Features

- Max Baud rate 230,400
- 10/100Base TX Ethernet port
- User friendly software
- Power input 5-30V DC
- Web-page configuration and RFC2217-compliant interface for non-Windows users
- LED status indication
- Rugged metal enclosure with integrated wall mount
- Optional DIN rail mounting kit

Range Features

- Requires no software
- Plug directly onto RS232 port for instant connection
- Intuitive configuration utility supplied for Windows & Linux
- Retain settings when powered down
- These devices can be powered from pin 9 of the peripheral
- Available as PC and device connectivity

PCI Express RS232

PCI Express RS422/485

uPCI RS232 & Powered RS232

uPCI Opto Isolated & RS422/485

PCI Express is the next generation of connectivity standard within PCs and servers. It is based on the current PCI bus, but is faster and requires less power. PCI Express (PCIe) slots are already replacing PCI slots within PCs and servers.

Brainboxes PX products ensure a smooth transition for customers from PCI to PCIe.

Our universal PCI cards are compatible with both 5V and 3.3V slots.

Brainboxes manufacture an extensive range of PCI cards with 1 to 8 ports, RS232 or RS422/485, low profile or standard height, and with or without cables. PCI cards are plug & play, fit internally to the PC and give the most secure add on solution for permanent installations.

Range Features

- Maximum baud rate: 921,600 with true 1Mbit line drivers
- FIFO buffer per port: 256 byte (1-4 ports), 32byte (8 ports)
- CE/FCC Compliant
- Plug & Play - auto configuring of interrupt and address

Range Features

- Maximum baud rate: 921,600 with true 1Mbit line drivers
- FIFO buffer per port: 256 byte (1-4 ports), 32 byte (8 ports)
- CE/FCC Compliant
- Plug & Play - auto configuring of interrupt and address
- RS422/485 Specific:**
 - Configurable as full or half duplex
 - Hardware autogating for guaranteed no data loss in half duplex cabling systems

Range Features

- Universal PCI (3.3V & 5V)
- Maximum baud rate: 115,200
- FIFO buffer per port: 128 byte (1 & 2 ports), 64byte (4 ports)
- CE/FCC Compliant
- Plug & Play - auto configuring of interrupt and address

Range Features

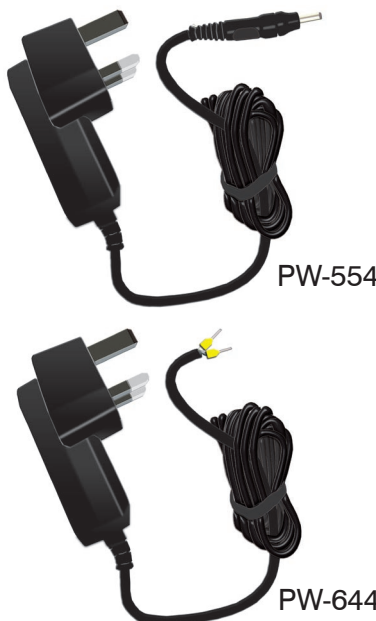

- Configurable as full or half duplex
- Hardware autogating - guaranteed no data loss in half duplex cabling systems
- Transient spike protection
- Terminating resistors for fail-safe open/short circuit protection
- Opto-isolation $\pm 1500V$ DC/1000V AC

Laptop			Accessories																																																																																																																																					
ExpressCard	PCMCIA		Cables	DIN Rail Kits & Adapters	Power Supplies																																																																																																																																			
ExpressCard slots are replacing PCMCIA slots in laptops. All new laptops only have ExpressCard slots. These RS232 & RS422/485 products are hot swappable, allowing the PC to stay active when expansion options are added or removed, ensuring minimum impact to the user.	Brainboxes PCMCIA cards are designed to take full advantage of improved mobile processing power. These products are based on Brainboxes' high performance custom chip. Ensuring all the features of PCI cards. Allows you to use your laptop as a true desktop replacement.		Lost your cable or need a spare? All of our cables are fully moulded, UL approved and are RoHS compliant, ensuring reliable connectivity for all your application needs.	DIN Rail Kits are available for our USB to Serial and Ethernet to Serial ranges. Adaptors are a simple cost effective solution to using our ExpressCard in older Laptops that only have PCMCIA slots (PM-200) and ensuring a perfect fit in newer Laptops that have either 34 or 54 ExpressCard slots (VX-056)	Our Power Supplies are available in several continent variations to ensure a perfect solution for your application. All of our Power Supplies are UL approved and are RoHS compliant, ensuring reliable connectivity for all your application needs.
